## **ROS 2 Cheats Sheet**

## Command Line Interface

All ROS 2 CLI tools start with the prefix 'ros2' followed by a command, a verb and (possibly) positional/optional arguments.

For any tool, the documentation is accessible with,

\$ ros2 **command** --help

and similarly for verb documentation,

\$ ros2 **command** verb -h

Similarly, auto-completion is available for all commands/verbs and most positional/optional arguments. E.g.,

\$ ros2 command [tab][tab]

Some of the examples below rely on:

ROS 2 demos package.

**action** Allows to manually send a goal and displays debugging information about actions.

Verbs:

info Output information about an action.

list Output a list of action names.

send\_goal Send an action goal.

show Output the action definition.

Examples:

\$ ros2 action info /fibonacci

\$ ros2 action list

\$ ros2 action send\_goal /fibonacci \
action\_tutorials/action/Fibonacci "order: 5"

**bag** Allows to record/play topics to/from a rosbag.

Verbs:

info Output information of a bag.

play Play a bag. record Record a bag.

Examples:

\$ ros2 info <bag-name>
\$ ros2 play <bag-name>

\$ ros2 record -a

**component** Various component related verbs. Verbs:

```
list Output a list of running containers and
```

components.

load Load a component into a container

node.

standalone Run a component into its own stan-

dalone container node.

types Output a list of components registered

in the ament index.

unload Unload a component from a container

node.

Examples:

\$ ros2 component list

\$ ros2 component load /ComponentManager \

composition composition::Talker

\$ ros2 component types

\$ ros2 component unload /ComponentManager 1

daemon Various daemon related verbs.

Verbs:

start Start the daemon if it isn't running.status Output the status of the daemon.stop Stop the daemon if it is running

**doctor** A tool to check ROS setup and other potential issues such as network, package versions, rmw middleware etc.

Alias: wtf (where's the fire).

Arguments:

--report/-r Output report of all checks.
--report-fail/-rf Output report of failed checks only.

Include warnings as failed

checks.

Examples:

\$ ros2 doctor

\$ ros2 doctor --report

--include-warning/-iw

\$ ros2 doctor --report-fail

\$ ros2 doctor --include-warning

\$ ros2 doctor --include-warning --report-fail

or similarly, \$ ros2 wtf

**extension\_points** List extension points.

**extensions** List extensions.

**interface** Various ROS interfaces (actions/topics/services)-related verbs. Interface type can be filtered with either of the following option, '--only-actions', '--only-msgs', '--only-srys'.

Verbs:

list List all interface types available.

package Output a list of available interface types

within one package.

packages Output a list of packages that provide in-

terfaces.

proto Print the prototype (body) of an inter-

faces.

show Output the interface definition.

Examples:

\$ ros2 interface list

\$ ros2 interface package std\_msgs

\$ ros2 interface packages --only-msgs

 $$ ros2 interface proto example\_interfaces/srv/AddTwoInts$ 

\$ ros2 interface show geometry\_msgs/msg/Pose

**launch** Allows to run a launch file in an arbitrary package without to 'cd' there first.

Usage:

\$ ros2 launch <package> <launch-file> Example:

\$ ros2 launch demo\_nodes\_cpp add\_two\_ints.launch.py

lifecycle Various lifecycle related verbs.

Verbs:

set

get Get lifecycle state for one or more nodes.

list Output a list of available transitions.

nodes Output a list of nodes with lifecycle.

msg (deprecated) Displays debugging information about messages.

Trigger lifecycle state transition.

Verbs:

list Output a list of message types.

package Output a list of message types within a

given package.

packages Output a list of packages which contain

messages.

show Output the message definition.

Examples:

\$ ros2 msg package std\_msgs \$ ros2 msg packages \$ ros2 msg show geometry\_msgs/msg/Pose multicast Various multicast related verbs. Verbs: Receive a single UDP multicast packet. receive Send a single UDP multicast packet. send **node** Displays debugging information about nodes. Verbs: info Output information about a node. Output a list of available nodes. list Examples: \$ ros2 node info /talker \$ ros2 node list **param** Allows to manipulate parameters. Verbs: Delete parameter. delete Show descriptive information about dedescribe clared parameters. Dump the parameters of a given node in dump yaml format, either in terminal or in a file. Get parameter. get Output a list of available parameters. list Set parameter set Examples: \$ ros2 param delete /talker /use\_sim\_time \$ ros2 param get /talker /use\_sim\_time \$ ros2 param list \$ ros2 param set /talker /use\_sim\_time false pkg Create a ros2 package or output package(s)-related Verbs: Create a new ROS2 package.

information.

\$ ros2 msg list

create

Output a list of package specific exeexecutables

cutables.

list Output a list of available packages. Output the prefix path of a package. prefix Output the information contained in xml

the package xml manifest.

Examples:

\$ ros2 pkg executables demo\_nodes\_cpp

\$ ros2 pkg list

\$ ros2 pkg prefix std\_msgs \$ ros2 pkg xml -t version

run Allows to run an executable in an arbitrary package without having to 'cd' there first.

Usage:

\$ ros2 run <package> <executable> Example:

\$ ros2 run demo\_node\_cpp talker

**security** Various security related verbs.

Verbs:

create\_key Create key. Create keystore. create\_permission Create permission. generate\_artifacts list\_keys Distribute kev.

create\_kevstore Generate kevs and permission files from a list of identities and

policy files.

Generate XML policy file from distribute\_key

ROS graph data.

List keys. generate\_policy Examples (see sros2 package):

\$ ros2 security create\_key demo\_keys /talker

\$ ros2 security create\_permission demo\_keys /talker \ policies/sample\_policy.xml

\$ ros2 security generate\_artifacts

\$ ros2 security create\_keystore demo\_keys

**service** Allows to manually call a service and displays debugging information about services.

Verbs: call

Call a service.

find Output a list of services of a given type.

list Output a list of service names.

Output service's type. type

Examples:

\$ ros2 service call /add\_two\_ints example\_interfaces/AddTwoInts "a: 1, b: 2"

\$ ros2 service find rcl\_interfaces/srv/ListParameters

\$ ros2 service list

\$ ros2 service type /talker/describe\_parameters

**srv** (deprecated) Various srv related verbs. Verbs: list Output a list of available service types. Output a list of available service types package within one package. Output a list of packages which contain packages services. Output the service definition. show

test Run a ROS2 launch test.

topic A tool for displaying debug information about ROS topics, including publishers, subscribers, publishing rate, and messages.

Verbs:

bw

Display bandwidth used by topic.

Display delay of topic from timestamp in delay

header.

echo Output messages of a given topic to screen.

find Find topics of a given type type. Display publishing rate of topic. hz

Output information about a given topic. info

Output list of active topics. list Publish data to a topic. pub type Output topic's type.

Examples:

\$ ros2 topic bw /chatter

\$ ros2 topic echo /chatter

\$ ros2 topic find rcl\_interfaces/msg/Log

\$ ros2 topic hz /chatter

\$ ros2 topic info /chatter

\$ ros2 topic list

\$ ros2 topic pub /chatter std\_msgs/msg/String \

'data: Hello ROS 2 world'

\$ ros2 topic type /rosout
